

This paddle adventure is best enjoyed in spring months after the initial melting floods.

The river's water levels drop significantly over summer.

Set in at the “Moose Range” bridge, just a short drive south of Town. The south-east side of the bridge offers a nice set in point.

Paddle along the approximate 16km river run at a leisurely pace or as fast as you choose!

Expect to see water fowl, some wildlife and maybe an eagle.

Pull out at the highway 23 bridge. Here you will find it to be rocky so watch your footing!
